Delta, Utah 84650 :

DECISION

Mineral Materials Site Inactive – Case Expired and Pending Closure

The Free Use Permit (FUP) for extraction of mineral materials, sand and gravel, at the location west of Notch Peak was authorized by the Fillmore Field Office, Bureau of Land Management (BLM), on October 30, 2011. The FUP pit is located in Tule Valley, west of Notch Peak, in Section 13 of Township 19 South, Range 15 West. The FUP authorization for this location was recorded as expired on October 01, 2011. The Bureau of Land Management (BLM) case file number for your FUP is UTU-58631_01. Please refer to this number in future correspondence.

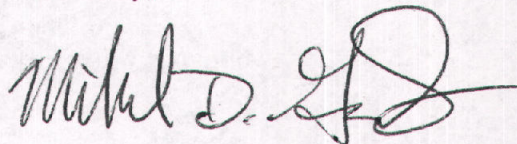

Field inspections by a member of the Fillmore Field Office staff on May 10, 2012 and November 30, 2012 found little evidence of extraction activity in recent years. A very small amount of excavation took place in one part of the pit prior to May 10, 2012, but there was no additional material removal between May and November 30, 2012. The surface disturbance area now has very sparse, mature vegetation. The rims of the pit location have adequate slopes, and the site has satisfactory earthwork.

Several crushed metal culverts remain at the site near the entrance. Please remove these objects from the location as soon as possible.

The case file for this former Free Use Permit will be closed when the culverts are removed. The BLM considers the site to be adequately reclaimed after the items of debris are removed.

If you have any questions, please contact Duane Bays, BLM Fillmore Field Office Natural Resource Specialist, at 435-743-3115, or Jerry Mansfield, BLM Fillmore Field Office Geologist, at 435-743-3125.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael D. Gates", followed by a large, stylized flourish.

Michael D. Gates
Field Manager

DECISION

Mineral Materials Site Inactive – Case Expired and Pending Closure

The Free Use Permit (FUP) for extraction of mineral materials, sand and gravel, at the location west of Clear Lake was authorized by the Fillmore Field Office, Bureau of Land Management (BLM), on October 30, 2001. The FUP pit is located near the northern end of the Cricket Mountains, south of Delta, in Section 03 of Township 20 South, Range 09 West. The FUP authorization for this location was recorded as expired on October 31, 2011. The Bureau of Land Management (BLM) case file number for your FUP is UTU-63409_01. Please refer to this number in future correspondence.

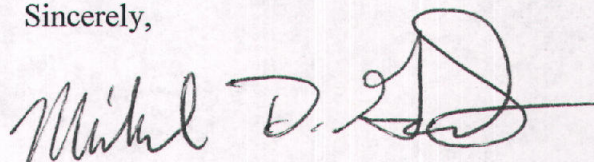

Field inspections by a member of the Fillmore Field Office (FFO) staff on July 2, 2012 and November 30, 2012 found no evidence of extraction activity in recent years. The surface disturbance area now has very sparse mature vegetation. The rims of the pit location have adequate slopes, and most parts of the site have satisfactory earthwork.

Several stockpiles of extracted material remain at the site. These stockpiles should be removed by the County or flattened to blend with the surrounding topography.

The case file for this former Free Use Permit will be closed when the stockpiles are removed and all remaining earthwork is completed. The BLM will consider the site to be adequately reclaimed when the stockpiles are removed or regraded to conform to the site contours.

If you have any questions, please contact Duane Bays, BLM Fillmore Field Office Natural Resource Specialist, at 435-743-3115, or Jerry Mansfield, BLM Fillmore Field Office Geologist, at 435-743-3125.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael D. Gates". The signature is stylized with a large, looped "M" and a "G" that extends into a long horizontal stroke.

Michael D. Gates
Field Manager

Delta, Utah 84650	:	

DECISION

Mineral Materials Site Inactive – Case Expired and Pending Closure

The Free Use Permit (FUP) for extraction of mineral materials, sand and gravel, at the Cricket Mountain location was authorized by the Fillmore Field Office, Bureau of Land Management (BLM), on January 26, 1996. The FUP pit is located near the northern end of the Cricket Mountains, south of Delta, in Section 09 of Township 20 South, Range 09 West. The FUP authorization for this location expired on January 26, 2006, ten (10) years from the authorization date. The BLM case file number for your FUP is UTU-72881_01. Please refer to this number in future correspondence.

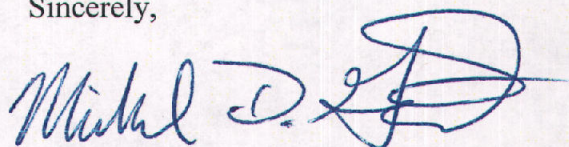

A field inspection by a member of the Fillmore Field Office (FFO) staff on November 30, 2012 found no evidence of extraction activity in recent years. The surface disturbance area now has very sparse mature vegetation, and the location is almost unrecognizable as a former sand and gravel operation. The former extraction area has adequate slopes, and most parts of the site have satisfactory earthwork. A single power pole remains at the gate to the site.

A small area of surface disturbance remains at the site near the power pole. This area should be regraded by the County and flattened to blend with the surrounding topography. In Universal Transverse Mercator (UTM) Zone 12 North American Datum (NAD) Coordinates, the surface disturbance area is located near 338833 E, 4328579 W. Also, the power pole must be removed or sawed off at ground level unless its presence can serve a continued useful purpose.

The case file for this former Free Use Permit will be closed when the power pole is removed and all remaining earthwork is completed. The BLM will consider the site to be adequately reclaimed when the rough basin surface is regraded to conform to the site topography.

If you have any questions, please contact Duane Bays, BLM Fillmore Field Office Natural Resource Specialist, at 435-743-3115, or Jerry Mansfield, BLM Fillmore Field Office Geologist, at 435-743-3125.

Sincerely,

A handwritten signature in blue ink, appearing to read "Michael D. Gates", with a stylized flourish at the end.

DECISION

Mineral Materials Site Inactive – Case Expired and Pending Closure

The Free Use Permit (FUP) for extraction of mineral materials, sand and gravel, at the location west of Kanosh, on the Kanosh gravel road, was authorized by the Fillmore Field Office, Bureau of Land Management (BLM), on October 30, 2001. The FUP pit is located between White Sage Flat and Lava Ridge in Section 09 of Township 24 South, Range 07 West. The FUP authorization for this location expired on September 27, 2010. The Bureau of Land Management (BLM) case file number for your FUP is UTU-63403_01. Please refer to this number in future correspondence.

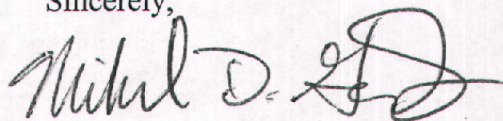

Field inspections by a member of the Fillmore Field Office (FFO) staff on September 26, 2012 found no evidence of extraction activity in recent years. The surface disturbance area now has very sparse mature vegetation. The rims of the pit location have adequate slopes, and most parts of the site have satisfactory earthwork. The surface disturbance area is 0.6 acres.

Several stockpiles of extracted material remain at the site. These stockpiles must be removed by the County or flattened to blend with the surrounding topography.

The case file for this former Free Use Permit will be closed when the stockpiles are removed and all remaining earthwork is completed. The BLM will consider the site to be adequately reclaimed when the stockpiles are removed or regraded to conform to the site contours.

If you have any questions, please contact Duane Bays, BLM Fillmore Field Office Natural Resource Specialist, at 435-743-3115, or Jerry Mansfield, BLM Fillmore Field Office Geologist, at 435-743-3125.

Sincerely,

A handwritten signature in dark ink, appearing to read "Michael D. Gates", with a stylized flourish at the end.
